ROUND CUT

Time tested and proven, classic shape, tuned for destruction, performance and a controlled slide.

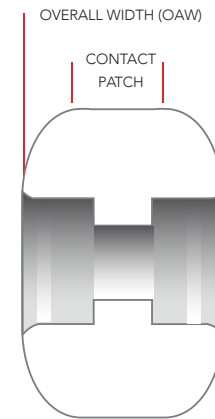

FUNNEL SHAPE

A wider overall width with a conical cut shape, brings more traction and more ground coverage with superior response.

ROUND CUT (SLIM) \bar{S}

Slightly slimmer version of our standard round cut wheel, a tighter width and skinnier contact patch for a lighter faster wheel.

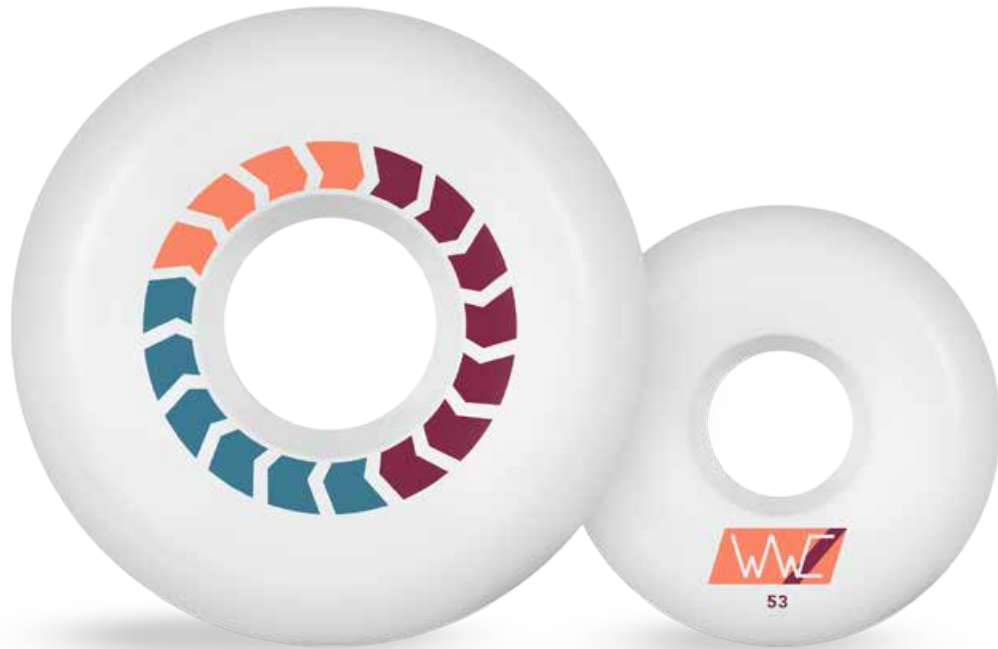

ROUND CUT (FULL) \bar{F}

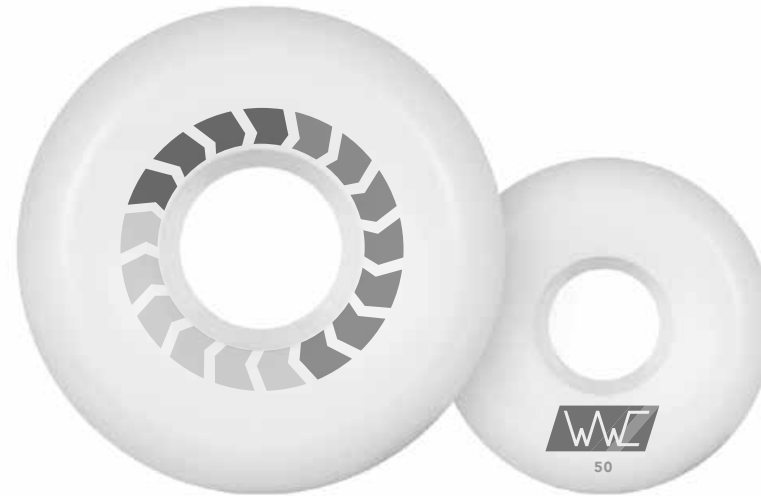

Wide body version of our tried and true Round Cut shape, offering a little more stability and distance with every push.
